OMEGA LIFT EQUIPMENT™

MAGIC LIFT

Omega Lift Equipment™

Omega Lift Equipment is a premium line of commercial quality lifting and workshop equipment. The equipment is designed with patented, unique features and offers ease of usability and durability. Omega Lift Equipment creates products with the current CE standards in mind. Omega Lift Equipment offers affordable, dependable, and quality product to the commercial marketplace. All Omega Lift Equipment are warranted against defects in material and workmanship for a period of two (2) years (from the date of purchase).

Magic Lift™

- Magic Lift for fast and time-saving operation.
- Reaches the lifting point with only one stroke.

Magic Lift™

GENERAL FEATURES

Saddle pad

Patented air vented soft saddle pad prevents vehicle's chassis against scratching.

Soft Handle Foam

Soft Foam for extra protection. Prevents handle from accidentally damaging the car.

Full cover Saddle pad

Patented air vented soft saddle pad prevents vehicle's chassis against scratching.

PU-Wheels

PU-Wheels for easy and silent moving prevent damage to oil tight garage floors.

Universal Joint Mechanism

Universal Joint release mechanism provides precision control of load descent in any handle position.

Nylon Wheels

Nylon wheels for easy and silent moving prevent damage to oil tight garage floors.

Air Vent Valve or Oil Filler Plug

Exclusive designed breather plug automatically eliminates air in the hydraulic system, optimizing the jack's performance.

Metal Wheels

Metal wheels, long lasting and strong.

HYDRAULIC BOTTLE JACKS - HEAVY DUTY

SCREW TYPE - WELDED - AIR OPERATED

Hydraulic bottle jacks - screw type

Model: 1102500 - 1104500 - 1106500 - 1108500 - 1112500 - 1112900 1120500 - 1120900 - 10500 - 10990

- 2 - 100 Ton
- With easy adjustable extension screw (2-20 Ton).
- With rubber removable carry ring for easy storage of pump handle (2-20 Ton).
- Safety valve against overloading.
- Bottle Jacks 8 Ton and more are supplied with a carry handle.

Hydraulic bottle jacks - welded

Model: 1412000 - 1420000 - 1430000

- 12 - 20 - 30 Ton
- With easy adjustable extension screw.
- Safety valve against overloading.
- Bottle Jacks are supplied with a carry handle.

Air operated bottle jacks

Model: 18202C - 18206C - 17302C

- 20 - 30 Ton
- 8 - 12 bar suggested air pressure for optimal performance.

HYDRAULIC LONG JACK

Hydraulic long jack

Model: 44943 - 44947 - 44949 - 44980

- Polished ram plunger and cylinder protect seals from abrasion.
- Built-in safety overload valve.

44943 - 4 Ton - for crane 44017 *MagicLift™*

44947 - 4 Ton - for crane 44012

44949 - 4 Ton - for crane 44018

44980 - 8 Ton - for crane 44020

ENGINE STANDS & SUPPORTS

Engine stand

Model: 31000

- Capacity: 500 kg
- Size: 808 x 800 x 878 (mm)
- Head plate locks in 8 positions and rotates 360°

Engine support

Model: 90068

- Capacity: 300 kg
- 1 spindle
- Size: 1500 x 205 x 310 (mm)

Engine support

Model: 90165

- Capacity: 500 kg
- 2 spindles
- Size: 1650 x 205 x 310 (mm)

Engine support Equalizer

Model: 90150

- Capacity: 680 kg
- Optional for engine cranes
- To use in combination with engine cranes

BODY REPAIR KITS

Body repair kit

Model: 50040

- Capacity: 4 Ton
- Sets are portable for easy usage in shop or on the road.
- Designed for applications such as pushing, spreading and pressing of vehicle body panels as well as various component parts and assemblies.

Body repair kit

Model: 50100

- Capacity: 10 Ton
- Sets are portable for easy usage in shop or on the road.
- Designed for applications such as pushing, spreading and pressing of vehicle body panels as well as various component parts and assemblies.
- Handy tubing storage compartment design.
- With wheels

BENCH, SHOP PRESS

Hydraulic hand pumps

Model: 55040 - 55100

- Capacity: 4 Ton
- Built-in safety overload valve.

Air actuated treadle pump

Model: 22903

- Capacity: 1500cc / 700 bar
- Built-in safety overload valve.
- Durable lightweight aluminum reservoir.
- Foot pedal provides handsfree user-friendly operation.

55040 - 55100

Hydraulic cylinders

Model: 55049 - 55109

- Capacity: 4 Ton - 10 Ton
- Internal plunger wipers help seal out dirt and a guide ring is designed to protect against side load damage.
- Industrial hard chrome plated ram helps to prevent rust and corrosion.
- Maximum working pressure: 700 bar / 10000psi.

55049 Also included in the auto body repair kit 50040.

55109 Also included in the auto body repair kit 50100. (page 38)

Pull cylinders

Model: 71055 - 71105

- Capacity: 5 Ton - 10 Ton

3-in-1 Car dolly

Model: 47020

- Capacity: 900 kg / piece
- Can support the vehicle in 3 different ways by the wheel / the pinch weld / the frame
- No adapters required
- Integrated frame adapters
- Locking casters
- No tools required
- Adapter secured with pins
- Easily stacked for convenient storage

SOLD IN PAIRS

TYRE HANDLING EQUIPMENT MOVE JACK - WHEEL DOLLY - BEAD BREAKER

Move jack

Model: 90250

- Capacity: 680 kg / piece
- Ideal for manoeuvring cars in shops and showrooms.
- Rigid steel frame - 680 kg capacity per jack, 2720 kg capacity per 4 jacks set.
- Handle tyres from 12" / 305mm wide.
- Easy foot-pedal operation.

2 Jacks: allow full 1800 vehicle pivot.

4 Jacks: Place vehicle on 360° rolling platform.

Wheel dolly

Model: 47053

- Capacity: 680 kg
- Hydraulic system actuated to provide smooth, positive power for the removal and installation of single, tandem and duplex tyres and wheels.
- Adjustable cradle rollers and lifting height.

Bead Breaker

Model: 22910

- Capacity: 5 Ton
- Oil capacity: 250(cc)
- For single rimmed wheels, with a maximum rim size of 25"

For Your Safety

NEVER use any equipment list in this catalog without first completely reading, understanding, and following the instructions AND safety precautions noted in your product's owner's manual. The warnings and/or safety messages listed below are NOT a complete list of warnings. We insist that you read your product's owner's manual thoroughly and keep your manual available for referencing throughout the life of your product.

Service Jacks and Jack Stands

Inspect before each use. Do not use if broken, bent, cracked, or damaged parts (including labels) are noted. Any jack that appears damaged in any way, operates abnormally, or is missing parts, shall be removed from service immediately and the manufacturer should be notified. If you suspect that the jack was subjected to a shock load (a load dropped suddenly, unexpectedly upon it), immediately discontinue use until the jack has been checked by a factory authorized service center (contact distributor or manufacturer for a list of Authorized Service Centers). It is recommended that an annual inspection is done by qualified personnel. Replace worn or damaged part with the manufacturer's authorized replacement parts only. Labels and owner's manuals are available from manufacturer. **WARNING:** Never use this jack as a stand-alone device. After lifting, immediately support the lifted vehicle with an identical pair of appropriately rated vehicle stands.

WARNING: Do not lift or carry jack by handle. Handle could dislodge and jack fall, resulting in possible injury or property damage. **WARNING:** lift only on areas of the vehicle as specified by the vehicle manufacturer. **WARNING:** Never work on, under or around a load supported only by a hydraulic jack. **WARNING:** Overloading may cause hydraulic system failure and sudden loss of load. **WARNING:** Clear all tools and personnel before lowering vehicle. The further release valve (handle) is turned counter-clockwise, the faster the load will descend. Maintain control of the speed at which the load lowers at all times.

Cylinders/Rams and Bottle Jacks

- Do not exceed rated capacities
- Use only on hard level surface capable of sustaining the load
- Do not connect actuators to pumps with higher pressure ratings
- Always inspect hoses and connections for damage prior to use
- Keep hands and feet clear of work area
- Immediately after lifting, support the load with appropriate means
- Use only manufacturer approved hydraulic fluid (when applicable)
- No alterations shall be made to these products
- Failure to heed these markings may result in injury and/or property damage

Hydraulic Pumps

READ AND UNDERSTAND ALL WARNINGS. INSTRUCTIONS AND OWNER'S MANUAL INFORMATION BEFORE ATTEMPTING TO USE THIS EQUIPMENT

- Burst hazard exists if hose or connection pressure exceeds rated pressure.
- Do not exceed the rated capacity of this device. Monitor pressure and load at all times.
- Verify load with calibrated load cell and indicator, accurate pressure gauge or equivalent devices.
- Inspect hoses and connections for damage prior to use. Never attempt to grasp a leaking pressurized hose.
- Release the hydraulic pressure before disconnecting hoses couplers, and before servicing the pump or accessory.
- Immediately after lifting, support the load with appropriate means. Never rely on hydraulic pressure to support a load.
- Wear protective clothing and eye protection that meets CE standards when operating this equipment.
- Ensure that the chosen application is stable to work on and around.
- Do not subject the pump and its components to shock loads.
- Do not connect to application which can return more oil to the reservoir than the pump reservoir can hold.
- Ensure that the rated pressure of all applications and fittings be equal to or greater than the rated pressure of this pump.
- Keep hydraulic equipment away from flames and heat.
- No alterations shall be made to this device.
- Failure to heed these warnings may result in personal injury as well as property damage.

For other more product related safety messages, please refer to the products owner's manual. SFE Europe B.V. reserves the right to correct any error, inaccuracy, omissions or to update the contents of this catalog without notice.
